

ADVANCING Women of Color in STEM through Meaningful Mentoring: Key Observations from the Jackson State University ADVANCE Institutional Transformation Project

Deidre L. Wheaton
Jackson State University

Loretta A. Moore
Jackson State University

Author Note

Deidre L. Wheaton, Ph.D., is an Assistant Professor of Interdisciplinary Studies, PI on the Expanding the Network of STEM Scholars Program, and a member of the JSU ADVANCE IT leadership team. Her research and teaching integrate race, educational access/equity, and broadening participation of underrepresented groups in higher education. Additionally, Deidre engages in adult learning and faculty development giving special attention to institutional and classroom climates that promote positive learning experiences and supportive work environments for women of color.

Loretta A. Moore, Ph.D., is a Professor of Computer Science at Jackson State University (JSU) and is currently serving at the National Science Foundation as Section Head for the EPSCoR program within the Office of Integrative Activities through the IPA program. She previously served as Vice President for Research and Federal Relations at JSU, and she served as Principal Investigator for JSU ADVANCE and several related grant funded projects which are aimed at advancing the careers of female faculty in Science, Technology, Engineering and Mathematics disciplines.
